

## SOME TESTIMONIALS

*"Hello, my husband and I are completely satisfied with the solar pool heating system. We have seen a real difference in the water temperature and the much longer use of our pool. Regarding the maintenance, we did nothing special during the season. The valve systems are easy to use. We are waiting impatiently for the sunny days in order to get the system back on track and enjoy our pool sooner than ever before. With my greetings,"*  
Ms Javieze, Carignan

*"I would like to express my great satisfaction with the installation by competent people and the efficiency of my solar heating for my swimming pool. It is September 19 and I managed to raise the temperature of my swimming pool to 85 degrees. The promised performance is here! An extremely satisfied customer."*  
Gilles Brooks, St-Bruno-de-Montarville

*"My pool was at 86 degrees! This thing works great! ... there is no reason to install a heat pump... Finally, your installation team have worked very well. They were courteous, clean and the installation was done very professionally. Thank you."*  
Alexandre Venne, Laval

## PORTFOLIO

## THE COMPANY

Since  
1976

More than forty years ago, TechnoSolis revolutionized the solar pool heating industry with a highly efficient and robust solar panel. Due to the quality and performance of our products, as well as our customer service, our company has experienced extraordinary growth since then. We now have offices in Canada and the United States, as well as distributors throughout the world.

## THE PRODUCT

The TechnoSolis solar panel is extra resistant especially because of the 104 tubes molded directly in the piping at both ends of the panel.

Our solar collector stands out from the competition. Thanks to its monobloc design and its interconnected flow tubes, air does not circulate around them, thus minimizing heat loss.

Technosolis solar panels have easily surpassed all quality and performance standards set by various solar testing agencies such as The Florida Energy Center (FSEC) and the Solar Rating and Certification Corporation (SRCC).

Fully enjoy your pool!
